

ATLAS APPROVED WRB TAPES

Did you know that Atlas has a specific list of approved WRB tapes?

Atlas Wall CI Board family of sheathing products (EnergyShield®, EnergyShield® CGF (formerly Rboard®), EnergyShield® Pro, and EnergyShield® CGF Pro) do not require taping of seams. However, taping of seams, penetrations, and repairing the damaged facer is required when relying on the system to act as a water resistive barrier (WRB).

Where the Atlas EnergyShield family of products are used within a WRB system, all penetrations and flashings details must be observed as described in our ICC-ES ESR-1375 Report. (available for download, on our website.)

ICC-ES ESR-1375 APPROVED TAPES FOR ATLAS WRB:

- **VENTURE TAPE 1599B**
- **VENTURE TAPE 1519 CW**
- **3M ALL WEATHER FLASHING TAPE 8067**
- **ZIP SYSTEM FLEXIBLE FLASHING TAPE**
